PREFACE

This Mission Coverage Index (MCI) furnishes a listing of intelligence targets in China covered by aerial photography from CHURCH DOOR Mission [REDACTED] [REDACTED] An explanation of column headings and photo reference data used in presenting the information is contained in the appendix.

25X1C

25X1C

25X1C

The user of this MCI is cautioned that the scan of photography from Mission [REDACTED] was accomplished in a relatively short time and often without the aid of precise analytical and mensural equipment commonly employed in detailed photographic analysis. Consequently, although the information presented herein is essentially accurate, future detailed analysis may somewhat alter portions of the information.

Large-scale photography on the planned flight line beyond geographic coordinates 24-00N 113-00E was not obtained because of camera malfunction.

25X1D		2327N 11316E	0614	[REDACTED]	19-A

APPENDIX
EXPLANATION OF COLUMN HEADINGS
AND PHOTO REFERENCES

City, Installation--This column contains the name of the city or town nearest the installation, followed by the name of the installation. If the name of the installation is not known, it is titled according to its function. The city and installation names are followed by a capsule description, where appropriate.

Coordinates--Coordinates are referenced to the SW corner of the minute square. When the subject installation covers a wide area, coordinates are given for the approximate center of the installation.

WAC--This column provides the World Aeronautical Chart number for the area in which the subject installation lies.

Installation Numbers--The Installation Numbers column is divided into two subcolumns. The first subcolumn lists, when known, the BE installation number assigned to the target. The second subcolumn lists the installation number assigned by NPIC. Installation numbers, when used to reference an item, should be prefixed by the appropriate WAC number, since the installation numbers are repeated from WAC to WAC. For example, there is an NPIC target numbered 0614-1 and an NPIC target numbered 0498-1. In each instance, the NPIC installation number is 1, but the installations appear on different WACs.

The photo reference indicates frame(s) on which the target appears, and conditions which affect interpretation of the target.
